

CINEMA 4D ACADEMY PROGRAM

Terms & Conditions

Cinema 4D provides the easiest entry into the fascinating world of 3D. Students are able to quickly achieve amazing results, which is an advantage that numerous educational institutions worldwide value greatly.

Since budget considerations are a critical factor for many institutions, MAXON offers its own form of financial aid. Via the Cinema 4D Academy Program (CAP), educational institutions can apply for free classroom licenses for a period of one year if they are in financial need. This term can be extended, if necessary.

Program Conditions:

- MAXON offers free classroom licenses of Cinema 4D Studio to schools, colleges or universities. The institution does not have to be public or state-run but the enrollment fees must not significantly exceed the local average cost at public educational institutions
- The educational institution must teach a program that incorporates instruction of Cinema 4D in the standard curriculum or offer comparable Cinema 4D courses on a regular basis
- The institution must develop Cinema 4D courses and actively promote them to students. The institutions can either use the CAP curriculum provided by MAXON to design their courses, or they can develop their own course materials tailored to their specific needs
- The curriculum or course outlines for Cinema 4D courses must be reviewed by the mentoring MAXON partner. Changes and amendments must be made upon request of the mentoring MAXON partner
- Students should be actively encouraged to improve their Cinema 4D skills. MAXON may sponsor commercial copies of Cinema 4D or other materials on request to foster the participation of students in Cinema 4D-related contests, etc.
- The mentoring MAXON partner will offer an initial training to ensure that instructors are familiar with Cinema 4D, and to ensure that Cinema 4D courses are conducted at high standards. Update trainings are provided after a new release and instructors are advised to attend to familiarize themselves with new features and workflows
- An administrator/contact person must be appointed for all Cinema 4D-related matters
- Classrooms must be equipped with workspaces that meet the system requirements of the latest Cinema 4D version
- Institutions will receive a sufficient number of free classroom licenses to equip the labs for a period of 12 months. After this 12-month period the initial term has expired and an institution can re-apply for free licenses by submitting a new CAP application form. However, MAXON cannot guarantee approval of each request. The decision will be made individually and is based on the success of CAP at the institution. If not approved or if no application for renewal is made, CAP membership will be terminated for the respective institution.
- If the institution is not approved for a CAP renewal, the respective institution can purchase an MSA (regular price) with a discounted license price.

This informational sheet briefly summarizes the terms of the CAP program. If you have additional questions, please contact your local [MAXON partner](#) or our [MAXON education team](#).
